

Marco Random Ashlar Walling

Marco Random Ashlar Quartz and Limestone walling boasts a distinctive palette of warm greys and dusty whites, featuring fractal sized quartz and limestone deposits. The split face and tumbled sides highlight the individuality that natural stone is known for. These subtle tones lend themselves to both internal and external applications, from feature and retaining walls to facades.

Available in both random quadrilateral and irregular geometric formats, we offer Marco in both sawn-back and one-piece corners for efficient installation without compromise on appearance.

Leadtime for product is 12 - 14 weeks unless instock

Sealing & Cleaning

Tumbled recommends Sealing all Natural Stone Tiles

For more information on caring for your natural stone please refer to our website www.tumbled.com.au

Please note

If you are installing your stone without a grout joint we recommend an extra 15-20% for wastage. This then allows the stonemason to cut and shape the stone to ensure the joints are butt-jointed. We also recommend the installer unpacks each crate of stone and use the mix of the sizes supplied. Tumbled will not exchange smaller pieces for larger pieces, it is the installers responsibility to use all the sizes supplied.
