

# Shell Tuscan Rubble Walling

This captivating South Australian limestone has a light cream colour palette with consistently even textures across its surfaces. On close inspection, you'll discover a bevy of shells and fossil deposits that call to mind ancient scenes from our local coastlines. We offer Shell Limestone as Tuscan Rubble Walling, where we combine a mixture of limestone cladding thicknesses to be laid in an informal strata format, levelling the horizontal edges where possible.

**Sealing & Cleaning**

Tumbled recommends Sealing all Natural Stone Tiles

For more information on caring for your natural stone please refer to our website [www.tumbled.com.au](http://www.tumbled.com.au)

---

**Please note**

If you are installing your stone without a grout joint we recommend an extra 15-20% for wastage. This then allows the stonemason to cut and shape the stone to ensure the joints are butt-jointed. We also recommend the installer unpacks each crate of stone and use the mix of the sizes supplied. Tumbled will not exchange smaller pieces for larger pieces, it is the installers responsibility to use all the sizes supplied.
